eLite SIS Core Modules

University Management

Manage complete information about the institution along with different course offerings

Department Management

On a more granular level, maintain the information of different departments/business units in the institution and define the faculty and the subjects they teach in this module

Subject Management

Manage subjects offered by the institute and their curriculum, the examination pattern, lecture hours etc

Fees' Management

Define the fee heads and fee structure for all the financial transactions that the stakeholders may have with the institute. It may be in the form of fees, penalties, discounts, among others

Attendance Management

Provides a digital platform to perform all attendance related activities; attendance could be manually marked or device/s may be used.

Results Administration

Provides facility for faculty to upload and assign student grades, trigger approval process for the grades before posting and transcript generation

College /Multi Campus Management

Setup different campuses and their details in this module; Select which of the approved course offerings of the university is available for each campus

Course Management

Setup the different course offerings, prerequisites, curriculum, academic pattern, and the schedule for each

Student Registration

Improve the institute's registration process by digitizing forms and automating repetitive processes to make it easier for potential and returning students to sign-up for classes

Academic Management

Maintain the basic data needed for the system to function with the institute; define academic sessions, holidays, timetable, and other master data

Examination Management

Allow institutes to manage pre, post, and on-the-day examination activities

Certificate Management

Institutes can create, publish and digitally deliver documents for students and alumni

Self-Service Portal

Provide real-time access for the parents, students and stakeholders to relevant information with an intuitive interface to enable meaningful engagement with the school.

Student Feedback

Provide a platform for students to speak their mind and contribute to betterment by giving their valuable inputs/comments.
